Re: Application/Control Number 10/064,806 Amendment

Dear USPTO:

Please refer this to Primary Examiner Nicholas Ponomarenko.

Dear Mr. Ponomarenko:

Attached is our amendment to the above patent application intended to be responsive to your action requiring submission of drawings. My apologies for not having done that originally.

This amendment consists of 1) the drawings themselves with an initial legend/numbered annotation description page, and 2) a document comprising the marked up paragraphs which contain changes.

Most of the changes in paragraphs are simple insertions of figure numbers at places appropriate to the matter being described, in a couple of cases including the annotation number in the given drawing for more exact reference.

However, a few other changes have been made at the suggestion of the Australian patent attorney of Professor Roberts, who is not registered to practice at the USPTO. These consist mostly of deletions, such as the reference to a provisional patent of Prof. Roberts in the amended paragraphs document. All changes are solely for explanation purposes.

No changes to the abstract or the claims are requested.

The drawings themselves were drawn by Professor Roberts on "A" size paper. He sent them to me from Australia by their equivalent of Express Mail. I then copied them on to 8 1/2" x 11" paper, not knowing if "A" size would fit your files. I then made the appropriate paragraph changes.

Sincerely,

David H. Shepard
